

Datasheet

Data Cabinet for Test Track Simulation

- Data Cabinet for holding several measuring coils
- Measuring coils are suitable to build test setups in combination with active technology

Version: 18.08.2021

Productdetails

- Available with all fiber optic connectors from the Sachsenkabel supply programm
- Measuring length with booklet (including protocols of the Interferometer- and OTDR- measurements and the inspection plan)
- Several measuring coils in one cabinet
- Single elements length up to 4 m
- Including possibilities to patch

Availabile Fibertypes

- V-E9/125 μm (OS2 BI, Corning® SMF-28® Ultra)
- V-G50/125 μm (OM2)
- V-G50/125 μm (OM3 BI/OM4 BI)
- V-G62,5/125 μm (OM1)

Advantages

- Easy handling because of several length in one data cabinet
- Simple change of the test track because of the patches between the coils
